<u>Amendments to the Specification</u>:

Please replace existing para. **[0050]** with the following paragraph:

[0050] More specifically, FIGS. 10–12 illustrate three specific types of type_one commands; a write type_one command 260 in FIG. 10, a type_one read command 270 of FIG. 11 and a type_one response command 280 of FIG. 12. The commands 260, 270 and 280 include a five bit client ID, wherein the client ID is an index into a lookup table of commonly accessed [[data]] <u>addresses</u>. As discussed further below with regard to FIG. 13, the type_one command 260, 270 and 280 provide for shorter data transfer and thereby reduce overhead for shorter or common transfers.
